Mobile: +91-9600205581

SKILLS

- **Languages:** C++, C, Python, Java, JavaScript, HTML
- **Frameworks/Libraries:** React, Tailwind CSS, Flask, Django, TensorFlow, PyTorch, NumPy, Pandas, Matplotlib, Scikit-learn
- **Tools/Platforms:** LeetCode, Github, Git, Excel, VS Code, Jira, Overleaf
- **Core Skills:** Machine Learning, Data Visualization, Problem-Solving, Logical Reasoning, Quantitative Aptitude
Adaptability, Leadership, Teamwork

PROJECTS

- Krishi AI | [GITHUB](#)

May 2026

 - Developed an AI powered agricultural assistant using Retrieval-Augmented Generation (RAG) to provide accurate, context aware farming guidance.
 - Built a document ingestion and semantic retrieval pipeline using vector embeddings and FAISS for knowledge retrieval from agricultural resources.
 - Integrated LLM APIs to generate multilingual responses for crop management, fertilizers, irrigation, and disease related queries.
 - Designed scalable backend APIs and an interactive frontend interface for real time farmer assistance and conversational support.
 - Tech: Python, FastAPI/Flask, FAISS, HuggingFace, Groq API, React, NLP, RAG
- Fake Review Detection System | [GITHUB](#)

April 2026

 - Built and deployed an AI powered system to detect fake and deceptive product reviews using NLP techniques and anomaly detection.
 - Engineered linguistic feature extraction including sentiment patterns, review length anomalies, and semantic inconsistencies.
 - Developed a real time web application with integrated backend APIs for instant prediction and end-to-end ML pipeline execution.
 - **Tech:** Python, NLP, Scikit-learn, Flask, React, Pandas, Render
- Fraud Detection in Transactions | [GITHUB](#)

Sep 2025

 - Developed a machine learning based fraud detection system to classify transactions using behavioral patterns and anomaly detection.
 - Implemented data preprocessing, feature engineering and model training using Python, Pandas and Scikit-learn to improve prediction accuracy.
 - Designed a real time transaction classification pipeline with backend APIs for fraud risk prediction and efficient model inference.
 - **Tech:** Python, Pandas, Scikit-learn, Logistic Regression, Random Forest, XGBoost, Flask, Streamlit

CERTIFICATES

- | | | |
|---|--------------------------------|----------|
| • Basics of DSA using C++ | Lovely Professional University | Nov 2025 |
| • Mastering Generative AI and Generative AI Tools | Udemy | Sep 2025 |
| • Unveiling Basic Python Towards AI/ML | CSE Pathshala | Mar 2024 |
| • Beginning of C++ Programming | Udemy | Feb 2024 |

ACHIEVEMENTS

- **Top 10 Finalist in Code-A-Haunt Hackathon**

Ranked among the **top 10** teams for building an innovative solution under time constraints.

Jan 2024
- **Actively Solving Coding Problems on LeetCode**

Strengthening problem-solving and algorithmic thinking through consistent practice, aiming to solve 300+ problems.
- **Participated in Adobe India Hackathon**

Selected for **round 2**, gaining hands-on experience in brainstorming, prototyping and presenting skills.

Aug 2025
- **First Place in Communication Skills Workshop**

Secured 94% and received a trophy for excellence in articulation, clarity and presentation skills.

Mar 2025

EDUCATION

- **Lovely Professional University**

Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.8**

Punjab, India
Since August 2023
- **Excel Central School**

Indian School Certificate (ISC); **Percentage: 81%**

Tamil Nadu, India
June 2021 – March 2023
- **Excel Central School**

Indian Certificate of Secondary Education (ICSE); **Percentage: 96%**

Tamil Nadu, India
Year of Completion: 2021
